

HUNGRY FOR PROFIT: THE AGRIBUSINESS THREAT TO FARMERS, FOOD, AND THE ENVIRONMENT.

Millions go hungry every year in both poor and rich nations, yet hundreds of thousands of peasants and farmers continue to be pushed off the land. Applied in increasing volumes, chemical pesticides and synthetic fertilizers deplete the soil, pollute our food and water, and leave crops more vulnerable to pest outbreaks. The new and expanding use of genetically engineered seeds threatens species diversity. This...

Reader's Opinions

It's a series of academic papers on the agribusiness takeover of agriculture and how it affects food availability, quality, price, etc. The more interesting parts deal with potential future consequences of corporate "farming", biotechnology and global trade policies. First academic page-turner I've ever had the pleasure of stumbling...

Excellent set of essays, with global and longrange historical perspectives. Good essays on the historic centrality of the rise of capitalist agriculture, current growth of corporate power in agriculture, farm labor in...
